📇 Profile

Front-End Developer with 1+ year of hands-on experience building high-performance, responsive web applications using **React.js** and modern JavaScript frameworks. Passionate about continuous learning and long-term growth in the tech industry. Proven track record of improving user experience and reducing load times by up to 30% through thoughtful code optimization. Skilled at turning design concepts into seamless digital experiences and collaborating with cross-functional teams to deliver scalable, production-ready solutions. Now seeking to transition from freelance work to a structured company environment to contribute and grow within a professional team.

💼 Professional Experience

Front-End Developer, *Freelance*   2023 – present

- Developed and deployed custom websites and single-page applications (SPAs) for various clients using **React.js**, **Next.js**, **Tailwind CSS**, and **Node.js**

- Delivered responsive, mobile-first UIs with a focus on performance and accessibility

- Collaborated with designers and backend developers to integrate APIs and bring projects from concept to completion

- Improved client websites' load times and SEO through performance optimization and semantic HTML

- Built admin panels, dashboards, and custom CMS features tailored to client needs

- Managed version control and project tracking using **Git and GitHub**

🎓 Education

Bachelor of Management Information Systems,   09/2020 – 05/2024 | Cairo, Egypt
Thebes Higher Institute, Cairo, Egypt
Focused on the intersection of business and technology, gaining a solid foundation in information systems, database management, and software development.

🎗 Certificates

Web Development Challenger Track 🔗
Selected for the competitive Challenger Track by Udacity and ITIDA. Gained hands-on experience building responsive web pages using **HTML**, **CSS**, and **JavaScript**. Focused on practical front-end skills and best practices in user-centered design.

The Complete Node.js Course: RESTful Web Services with Node.js, Express & MongoDB
Mahara Tech, ITI – 2024
Comprehensive training in backend development with Node.js. Learned to build and deploy scalable RESTful APIs using **Express.js** and **MongoDB**, implement authentication, data validation, and handle secure routing and error handling.

📚 Courses

Pro Frontend Engineer ReactJS + TypeScript + Redux,   04/2025 – present
Udemy

React.js, *Mahara Tech, ITI*   01/2025 – 02/2025
Developed dynamic front-end applications using React.js, component-based architecture, hooks, and state management.

JavaScript Fundamentals, *Mahara Tech, ITI*   10/2024 – 12/2024
- Built a strong foundation in JavaScript, including ES6+, DOM manipulation, and asynchronous programming.

🧠 Skills

Frontend Development
- **HTML5**, **CSS3**, **JavaScript (ES6+)**
- **React.js**, **TypeScript**, **Tailwind CSS**
- Familiar with **Next.js**, **Redux**, **Responsive & Accessible Design**
- Web performance optimization (Lazy Loading, Code Splitting)

Frontend Tools & Build Systems
- **npm**, **Vite**, **Webpack**, **Babel**

Version Control & Collaboration
- **Git**, **GitHub**

Backend & APIs
- Basic knowledge of **Node.js**, **Express.js**
- Comfortable working with **REST APIs**

Soft Skills
- Problem-solving: Developing my skills through hands-on projects and coding challenges.
- Excellent team collaboration & communication: By working closely with designers and backend developers during freelance projects.
- High attention to detail & clean code practices.
- Fast learner with a passion for continuous improvement.
- Continuous learner with a long-term mindset: Demonstrated a growth mindset by consistently learning new technologies

📂 Projects

Point of Sale (POS) System – Kuwait Market   05/2025 – present
Tech Stack: PHP , Laravel
Collaborated on the front-end development of a live Point of Sale (POS) system serving retail clients in Kuwait.
- Improved user interface and user experience across key modules, including sales processing and inventory views
- Refactored legacy code for better performance, responsiveness, and maintainability
- Ensured cross-browser compatibility and optimized UI components for real-time operation

Prayer Times Web Application   12/2024
Tech Stack: React.js
Developed a modern web application that displays daily Islamic prayer times based on the user's location.
- Integrated a third-party **Prayer Times API** to fetch accurate, real-time data based on geolocation
- Implemented **dynamic UI rendering** and time-based updates for different prayer periods
- Designed a responsive and minimalist interface using **Tailwind CSS** for optimal usability across devices

Personal Portfolio Website 🔗   11/2024
Tech Stack: React.js, Tailwind CSS
Built a modern, mobile-responsive personal portfolio to showcase projects and skills.
- Built using **React.js** with modular, reusable components for scalability
- Styled with **Tailwind CSS** to achieve a clean, fast-loading, mobile-first design Focused on accessibility, responsive design, and clear project presentation to reflect professional branding
